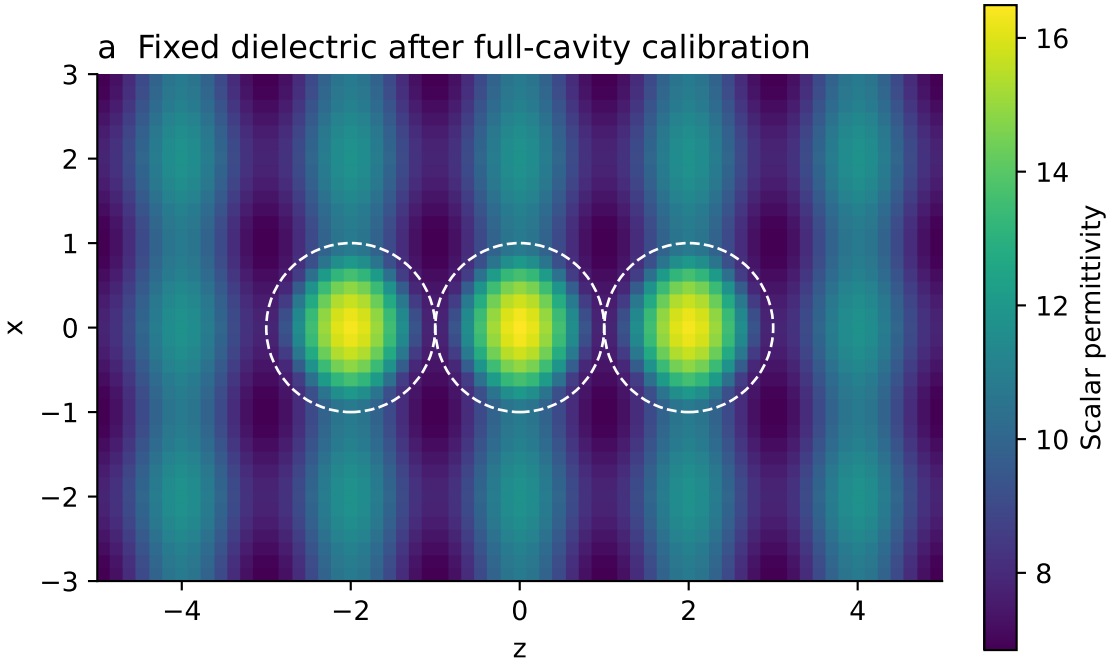
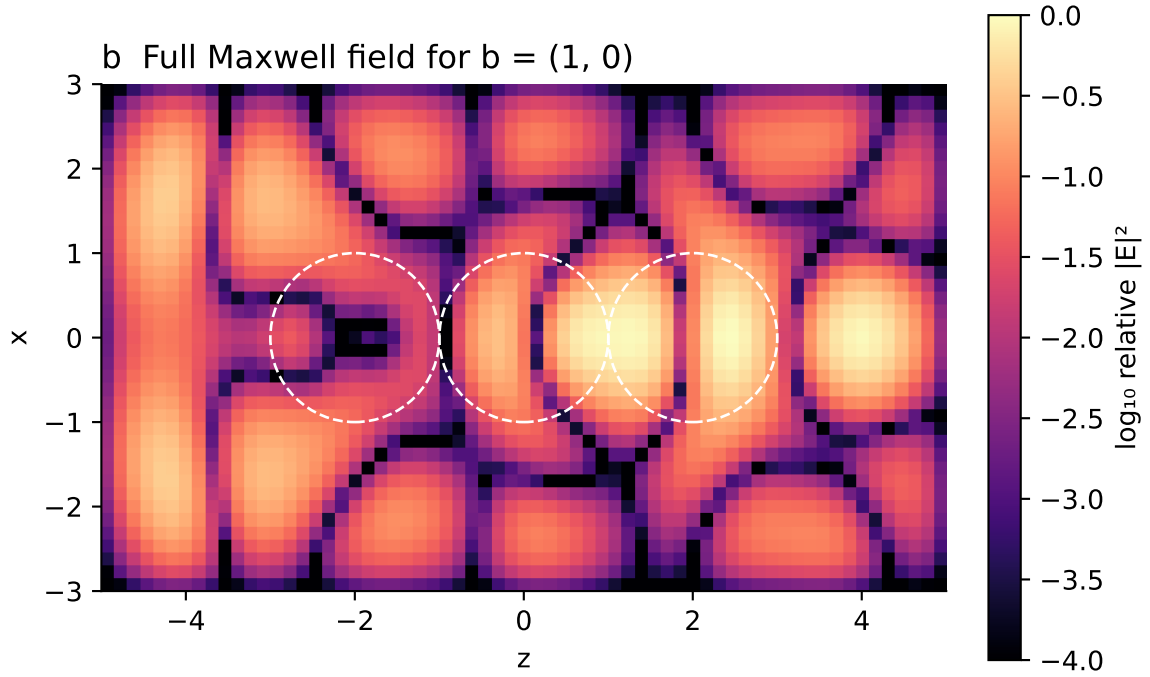
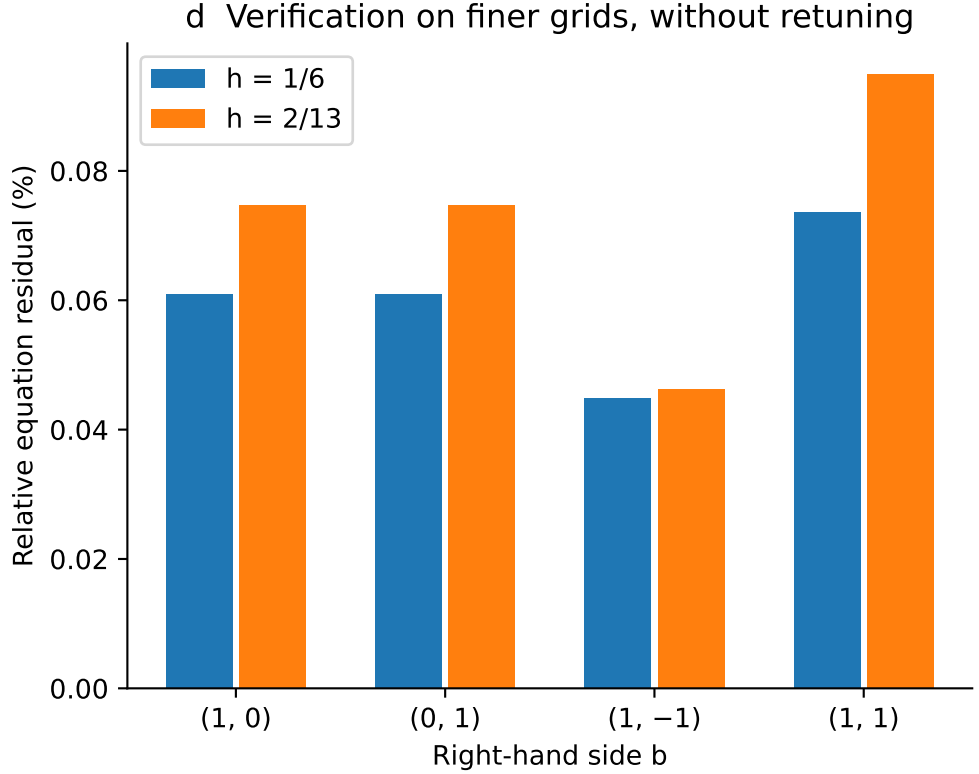
Full Maxwell simulation of a calibrated two-variable solver





c Γx = b, Γ = [[3, 1], [1, 3]]

b	Exact x_1	Exact x_2	Field x_1	Field x_2
(1, 0)	0.375	-0.125	0.374766	-0.125003
(0, 1)	-0.125	0.375	-0.125003	0.374766
(1, −1)	0.500	-0.500	0.499769	-0.499769
(1, 1)	0.250	0.250	0.249763	0.249763


Same medium, source kernels and decoder for every input.
Values shown on the finest verification grid (h = 2/13).
